About This Game

About:

iREC is a first person atmospheric horror game with puzzle elements. The player needs to investigate the location and collect evidence without drawing attention. Inspired by the environment of Outlast, iREC presents moments of tension, with an incredible atmosphere of terror.

iREC ●

Synopsis:

The game begins when a narcotics police officer gets a hint from an informant. No time to ask for a search warrant, he decides to act alone and invade the place, a logistics company called AtlasLog. During the investigation, he discovers that the company is fake, and is involved in drug trafficking, filmmaking, among others. He gets stuck in the place, and looking for clues, discovers the biggest secret behind everything.

iREC

Title: iREC

In short, All Star Fruit Racing sets out to offer a Mario Kart experience on the PC and doesn't fall all that far from the tree!! (See what I did there? [Fruit...Tree??](#))

Playing this game it is impossible not to feel like Venelope Von Schweetz, racing across the many hills and hollows of the 'Sugar Rush' circuit.

But as nobody made a 'Sugar Rush' game (Yet!), this is everything that it would be if they did, only fruit are a far healthier option my friend!

Make no mistake, this game is not without it's flaws, but they are completely overshadowed by fun and addictive gameplay, easy controls, lashings of bright, eye-catching visuals and a fitting, cute soundtrack to speed along to!

Definitely a game to check out, if you like your Mario & Diddy racers, and able, not only to ge in the ring, but also to punch above it's weight as a serious contender to them!

Hats off to the development team behind this gem of a game, who pulled off, what so many have failed to do before them...Bravo!

Looking for a stunning, fun, racing distraction, you could do far worse than this!

8/10. TL;DR version: The game is still in alpha, so if you don't want to deal with bugs, don't buy it to play it. However, even in it's current state, it's an excellent RISK or Monopoly style 'evening game' with friends, and hopefully will improve further in the future. For the price it's at, I strongly recomend it. And if you don't buy it, at least keep an eye on it.

I'd like to get one thing out of the way right off the bat. This game is already one of my favorite games, and if they are able to improve on it from what they have here, and truly flesh out the mechanics and support, than this will be one of the best games of all time, hands down.

However, right now, at this time, there are some problems with it, and you should be aware of them before you consider purchasing. First off, it is ONLY multiplayer right now, be it hotseat, lan, or online. Part of this is because the game is most certainly tailored for a multiplayer experience.

Unfortunately, the game does not have a chat feature, nor a lobby feature, which means that playing the multiplayer is a bit lessened as an experience, unless you have another means of keeping in contact with your friends. Additionally, the Online servers are VERY unstable. Not everyone will be able to connect, and it's tough to determine who and where the connection problem is at.

Aside from that, the game has very little explanation text, beyond the tutorial. The tech tree needs fleshing out, with a better description of how certain things behave, and what you can expect from them.

Now for the positives. Like a game of risk, this is a game best played by getting some buddies to sit down and play it out for an evening, forming alliances, backstabbing eachother, bemoaning your losses and cheering your victories. And it certainly brings that feel one hundred percent. I've yet to be able to play a large game with my friends, but I look forward to when I get the chance to, and to see a truly dynamic swing of advantages.. Storyline is good. Very colorful graphics and nice music. Mini games are fun.. Surpsingly this is a pretty fun game, especially with friends. I thought it would contain typical mini golf maps but it's a lot more creative/unique than that. I never knew how intense a game of golf with friends could be until I played this. The game makes things a lot more interesting by adding custom settings, such as changing the shape of the ball, or decreasing gravity. I would definitely recommend this game. There are a few bugs here and there but nothing game changing. Unfortunately the only thing I can say that's negative is that it's not really worth \$6 for only 4 maps and this game unexpectedly

makes my computer very loud for a simple golf game. I understand that it's an early access game and so, I look forward to the many additions the developers will bring to the game.. Still there is no competitor to Football Manager... Sad but true... 3/10 but try it as its free!

Italian and Portuguese people now look exactly alike.

10V10 would buy again. Beat the game within ten minutes! :(. Game wont start.
Goes past resolution and Rovio screens but on the Angry Birds vr Isle of pigs screen it loads 3/4 then goes black...and nothing.
WHY?. Second stop on the trip through my Steam library

I remember this and the first game being amazing when they came out, playing it now it is like a mediocre game wrapped in a low budget version of Days of our lives... if you really loved it back when it came out maybe the nostalgia would make it worthwhile, for me I always preferred the Lucasfilm/arts adventure games over these...

next

. Like the concept of the game but crashes all the time or loads improperly. haven't been able to play at all. Locks up my computer and have to use task manager to fix it. Sometimes that doesn't even work. Don't recommend it.
